

Big Oaks Natural Farm

Big Oaks Natural Farm in Monroe is owned by Fred Mundie, who is one of the original three farmers who started selling at MCFM 28 years ago. Vegetable crop farming has been a hobby for the last 60 years. All of the produce is grown using “all natural” methods (non-GMO, pesticide-free and chemical-free). Only certified organic fertilizer and homemade composted matter is used to aid the growth of their produce. It has always been their philosophy to sell a quality, as-fresh-as-possible product at a fair market price. Thanks to MCFM, they have always had a convenient location with a wonderful customer base that supports their efforts.
