

Dancing Bees Honey Farm

Jeff and Robin Knight of Dancing Bees Farm produce pure raw natural honey and honey products. Jeff has been a Master Beekeeper since 2001 and has over 20 years of bee experience. They both love nature, the outdoors, and working on their dream together, of owning a small farm business dedicated to preserving the importance of the honeybees. It involves a lot of work, but gives them both a lot of joy to pursue this passion called 'beekeeping'!

They named their business "Dancing Bees" as honeybees perform various "dances" to communicate to other bees, including a "waggle dance" designed to help the other bees make a "beeline" to the best pollen/nectar sources very efficiently. Their 36 acre farm has many sources of plant life for their bees to visit for their wildflower honey, including several Tulip Poplar trees, wild buttercups and sweet clover. They believe this gives their honey a very distinctive taste that their customers say takes them back to their childhood!

Robin and Jeff also produce whipped spreadable honey in a variety of flavors, beeswax lip balm, moisturizing lotion cups, nut -n- honey toppings, raw beeswax, honey bath scrubs and moisturizing masks, in addition to a variety of hand-made beeswax candles. All great for gift baskets! They also ship their products.
