

Allen Family Farms is a family owned farm located in Mount Pleasant, North Carolina. We raise grass fed, grain finished beef and pasture raised chicken. We pride ourselves on the quality of our product and the nature in which it is raised. We believe that our land sets the foundation for the quality and wholesomeness of our beef and chicken. We practice low stress animal handling, and manage our land in a way that improves our soils and environment. We promise to provide our communities with food that you can feel good about eating, because you know where it came from and how it was raised.
