

## Whisper Creek Farm

Rob and Holly Tartaglia "accidentally" became farmers. What started as a small garden grew into the purchase of a larger piece of land where they have since added chickens and hogs. It's a family affair as their three children are also active members of the team. All their animals are raised in a healthy, natural and humane manner, and processed at Animal Welfare Approved facilities. They care about eating responsibly, value local, clean foods and want to share their love of farming with the community. We are excited that they will be bringing their pasture-raised pork and free-range chicken eggs to the market. Cuts include chops, steaks, ribs, ham roasts, tenderloin, shanks, sausage, uncured bacon and leaf fat.
