

For The Birds

Kathy Broadway and Diana Neer are friends and neighbors and decided to launch their “For The Birds” business in June 2018. They have both always enjoyed watching birds in their backyard and decided to build bird houses for themselves. After they completed their first project they continued their research of bird house-building plans and began making a variety of styles, each one designed for outdoor use for a specific species of bird. Each bird house is handcrafted and can be either post-, tree-mounted or hung from a tree limb. The materials used are often repurposed, salvaged or gathered in the wooded areas. Great care is taken to ensure that all the materials used are nontoxic to the birds. They also provide both written and verbal information for the person who is new to owning a bird house. They wanted to share their enjoyment of birdwatching with others and, therefore, “For The Birds” came to be.
